- Participated in a GAR conference call for project update. They are approximately half way through Data Collection.
- Spoke with EFC via conference call ref the Town not applying for the water grant for water line extensions. I did explain the concerns the Town Board has in ref to setting up Water Districts, the funding of the projects that have been discussed and the need to determine if our residents want municipal water to combat the PFOA contamination or if we are content with the POET Systems as long as they continue to be maintained.
- Community Pool- Daily monitoring and closing.
- I met with Rachel Green to follow up on our 2017 Summer Day Camp. We had a couple of unusual situations to deal with this summer and it was encouraging to me to see the way our Camp Director and Councilors handled the situations. I received no complaints from parents and judging from everything I saw with the number of kids attending and taking swimming lessons it appears to be another very successful year for the Summer Camp.
- We have continued communication with St. Gobain and Honeywell through our Attorneys ref PFOA contamination. We have asked the companies to help us with the cost associated with retaining a technical advisor to assist the Town through the PFOA Contamination issue. This kind of assistance is sometimes available through the State and or Federal Government as a Technical Assistance Grant (TAG) but as a municipality we do not qualify for the grant. We have heard back from the Companies and they have agreed to give the Town a one-time grant in the amount of \$20,000 to be used to retain a technical advisor. The check is being processed and we have been told we can expect to see it shortly.
